

Port Operations & Revenue Tracking System On-Line (PORTS On-Line)

PORTS On-Line is a web based integrated vessel scheduling, cargo tracking and billing system for port authorities.

- » Web based
- » Voyage module for tracking vessel arrivals, shifts and departures
- » Cargo module for tracking import and export cargo
- » Billing module for generating vessel and non-vessel related invoices and credits
- » Integrates with in-house A/R System
- » Imports electronic vessel movement data
- » Imports electronic manifests data

The screenshots display the PORTS On-Line web application interface. The main window shows a sidebar with navigation options: Vessel Traffic, Cargo, Manifest Stubs, Import Manifests, Assign To Stubs, Review Manifests, Manage Manifests, Services, Billing, Reporting, and Administration. The main content area is divided into several sections:

- Import Electronic Manifests:** A table listing available files for import with columns for filename, size, and created on.
- Review of Imported Manifests - Details:** A detailed view of a manifest with a table showing columns for Container #, Size, Commodity Code, Description, Weight UOM, Volume UOM, and Quantity. Below this is a 'Single-Item Edit' form with fields for Initial, Container #, Size, Commodity, Weight, Volume, and Quantity.
- Commodities:** A detailed view of a commodity with fields for Commodity Group, Code, Description, Active, Harmonized Codes, and Effective Dates.

“ Not only are the staff at Nicom technically very competent they are great to work with. ”

Ralph Seely, Vice President & Administration, Saint John Port Authority

Nicom IT Solutions Inc. has been in the IT business since 1982. We are proud of the special relationship and partnership that we enjoy with Microsoft.

SYSTEM FEATURES

PORTS On-Line is able to integrate with various existing operational systems enabling the efficient automation of invoicing, tracking and reporting on port transactions, vessel calls and revenue generation. The easy-to-use interface allows stakeholders to quickly access and evaluate information they need to maintain accurate records and forecast for the future.

Invoicing System

PORTS On-Line billing module can be easily integrated with existing accounting systems and can calculate a wide variety of tariffs and fees such as:

- » Harbor dues
- » Dockage fees
- » Wharfage and throughput charges
- » Water and electricity charges
- » Passenger charges and
- » Welding & cutting and dangerous goods permits

Reporting Capabilities

PORTS On-Line's robust and user friendly reporting tool can generate graphically appealing ad-hoc or custom reports. Whether seeking statistical data or gathering marketing intelligence, decision makers are able to get the right information on time and export to an Microsoft Excel or HTML format. The types of reports that are available include:

- » Out of the box reports
- » Reports for KPIS for your port
- » Integration with Microsoft SQL Server reporting services for custom reporting

WHO WE ARE:

Nicom Maritime, division of Nicom IT Solutions Inc., are experts in management information solutions, offering both professional advisory services and software products to the seaport industry. We help our clients identify their business needs and recommend technology solutions that streamline communication processes, improve efficiencies and reduce operational costs. We provide our clients with the best information technology advice and in turn, the best solutions. For additional information on Nicom IT Solutions Inc., visit www.nicomit.com.
